SPECIFICATION FOR CITIZENS BAND TRAFFIC ALERT RADIO

1. Scope

This specification covers Citizens Band Traffic Alert Radios for use on streets and highways to alert drivers of congestion, back-ups, work areas, or other hazards and restrictions. The radio monitors transmissions on a preselected Citizens Band radio channel(s) and when it detects an absence of transmissions, it will transmit a prerecorded safety message.

2. Requirements

- 2.1 The Citizens Band Traffic Alert Radio is to comply with all applicable Federal Communication Commission (FCC) regulations and standards.
- 2.2 It must be capable of monitoring and transmitting on all standard citizens band radio channels.
- 2.3 The radio shall store a minimum of three messages which may be recorded on site and allow the operator to select one of the three recorded messages for transmission.
- 2.4 The radio shall be capable of sampling two channels in sequence and delay the repeating messages from 30 to 90 seconds.
- 2.6 The Citizens Band Traffic Alert Radio must be capable of being powered by an AC adapter, 12-volt vehicle or other equipment (e.g., portable changeable message sign) electrical system, and a separate battery pack.
- 2.7 The device must be portable and easily lifted by one person.
- 2.8 It is to transmit only when the channel is clear.

3. Application

- 3.1 May be used on any highway. Locate the radio for clear reception upstream of the condition in order to allow

drivers sufficient time to react.

- 3.2 Drive through the area to determine limits of reception. Relocate the device if necessary.
- 3.3 Messages are to be specific and confined to information related to unusual, temporary or recurring highway or traffic conditions, such as, "traffic is stopped ahead," or "left lane is closed beyond Cameron Street." Generic safety messages such as, "drive safely" or "buckle up" are not to be used. When used for recurring conditions, the radio shall not broadcast unless the condition actually exists.
